Get going with cards as a service!

Nexus GO Cards enables organizations to issue identification cards without the hassle of complex, locally-installed software & hardware systems.
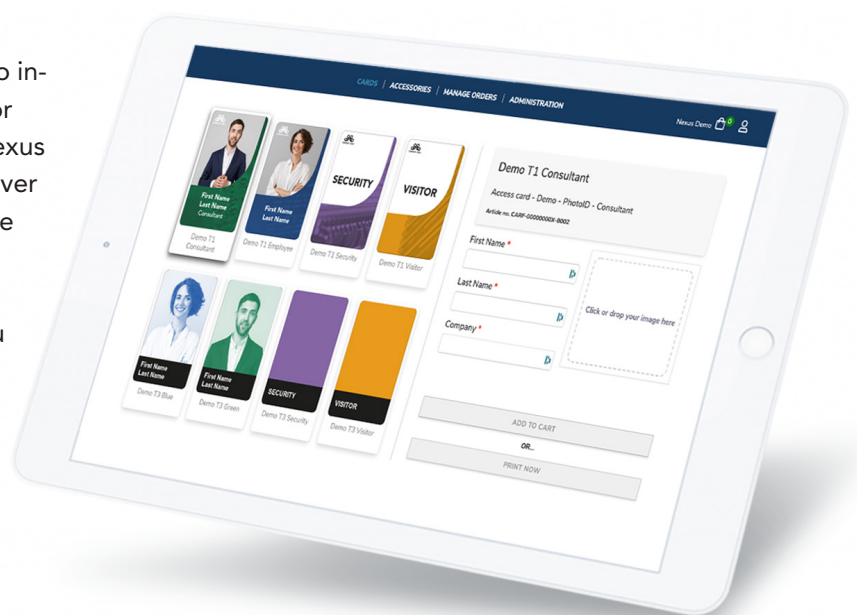

Nexus GO Cards enables quick and easy ordering of cards, key fobs and accessories. Receive your cards and accessories personalized, encoded and ready to use. Whether your organization needs highly secure and customized identity cards or standard non-programmed cards, Nexus' online service produces and delivers high-quality, high-volume assets every day.

Secure identity card management in the cloud

Nexus GO Cards offers organizations the expertise and ease you need to make ID printing and order management a success.

Through the GO Cards service, there is no investment needed in additional hardware or software and you can rely on the skilled Nexus team and our automated processes take over to ensure you receive printed cards that are encoded and ready to use.

Let Nexus focus on card production so you can focus on your core business tasks!

How does it work?

Nexus GO Cards is a flexible and secure solution that lets organizations choose how they order. Whether using our smooth and easy online portal or integrating an existing system, you can be assured that ordering, tracking, and reporting have never been more convenient.

The card ordering and management process is straightforward and easy to use. User information is passed, manually uploaded or even recipients are invited to input it to Nexus GO Cards.
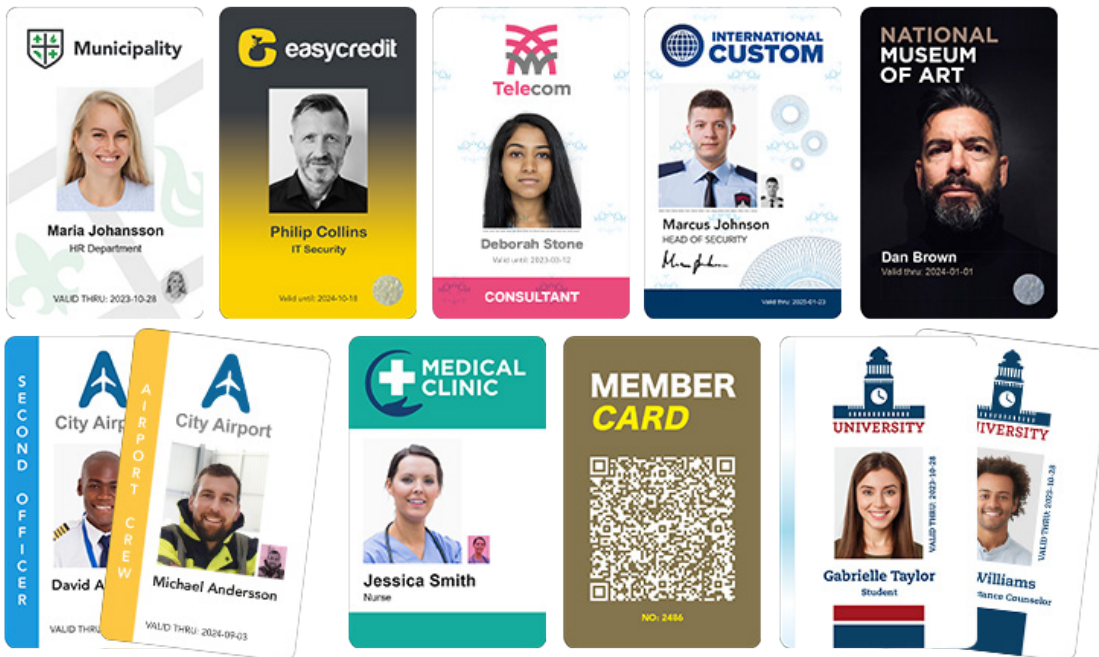

Once pre-determined requirements are met and approvals are given, cards can either be printed locally or at one of our secure personalization centers.

Card is delivered along an activation link sent to the recipients. Data reporting is only performed once activated online, rendering the card useless before activation, securing your sites' access.
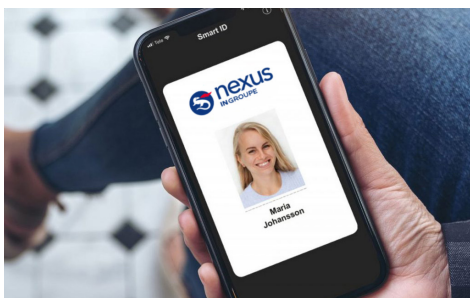

What is included?

Nexus GO Cards enables you to get your cards and key fobs delivered fully customized, encoded, and ready to use. A Nexus card specialist will support you with the onboarding to ensure you have the right security levels for your organization. In addition, our team will create several customized card layouts to ensure you receive the design that fits your needs. Lastly, we will deliver a sample of the card so you can test the functionality and check the design.

Add on customized or standard accessories from Nexus' high-quality assortment.

Select from a wide variety of RFID technologies and a number of visual security features. Interested? Contact us to get started!

Mobile visual ID. Add as a complement to your card!

Extend the card solution and offer your employees to have a smooth mobile visual ID card to cover extended use cases. Now this function is added as an additional feature to your physical card!
